

ABSTRACT OF THE DISCLOSURE

A lens-fitted photo film unit contains a battery unit.
The battery unit has a battery, which includes positive and
negative battery electrodes. A battery case is formed from
5 insulating material, and contains the battery. An elastic
cap is included in the battery case. First and second
contact segments are thrust through respectively the elastic
cap in a watertight manner, and contact respectively the
positive and negative battery electrodes, for external
10 connection of the battery.
